

Ankit Paul

Senior Software Engineer (.NET Core | Financial Systems)

+91 9775071711 | ankitpaulonwork@gmail.com | [linkedin.com/in/paulonweb](https://www.linkedin.com/in/paulonweb) | paulonweb.netlify.app

SKILLS

Backend & Frameworks: .NET Core, ASP.NET Core, C#, REST APIs, Entity Framework, JWT, Dependency Injection, Microservices, xUnit, NUnit.

Frontend: React.js, JavaScript (ES6+), Angular (Basic), HTML5, CSS3, Bootstrap, Axios.

Databases: SQL Server, Sybase, Redis, MySQL.

DevOps & Cloud: Azure DevOps, TeamCity, Octopus Deploy, Rancher, Docker, IIS, Git, Microsoft Azure (AZ-900).

Tools & Methodologies: Postman, Swagger, Visual Studio, VS Code, Figma, LogRocket, Agile/Scrum.

AI Tools: GitHub Copilot, Cursor AI.

Domain: US Retirement Services (401k), FO-FR File Processing, BGI Financial Transactions.

PROFESSIONAL EXPERIENCE

Senior Software Engineer 2023 – Present | Pune, India
Persistent Systems Pvt Ltd

- Engineered full-stack features for a US retirement services (401k) enterprise platform using ASP.NET Core and React.js.
- Designed and enhanced 5+ RESTful APIs within a microservices architecture to process FO-FR financial data and BGI transaction files.
- Led end-to-end Sardine bank verification integration across 3 environments, serving as the primary SME for multiple production releases.
- Managed 20+ CI/CD releases via TeamCity, Octopus Deploy, Docker, and Azure DevOps, ensuring stable production deployments.
- Migrated 5+ legacy ColdFusion loan and financial workflow modules to a modern .NET-based DCA architecture, improving maintainability and scalability.
- Resolved 20+ critical production defects in loan processing and financial workflow modules through debugging across backend services, logs, and databases.
- Leveraged GitHub Copilot and Cursor AI across 10+ feature enhancements, bug fixes, and development initiatives to accelerate coding and improve debugging efficiency.

PROJECTS

Ascensus – Legacy Modernization Initiative (ColdFusion → .NET DCA) 2025 – Present
Persistent Systems Pvt Ltd – Workstream 2

Tech Stack: .NET Core, ColdFusion, LogRocket, Google Analytics, SQL Server, Sybase.

- Refactored legacy loan and financial workflows into scalable .NET DCA services.
- Implemented LogRocket session replay and Google Analytics for user session monitoring and behavioral analytics.
- Identified and fixed production issues in loan processing modules impacting financial transactions, demonstrating deep system ownership across the loans and lending domain.

Ascensus – Digital Client Access (DCA) Platform 2023 – 2025
Persistent Systems Pvt Ltd – Workstream 1

Tech Stack: .NET Core, ASP.NET Core, React.js, SQL Server, Sybase, Redis, Azure DevOps, Docker, xUnit, NUnit.

- Integrated Sardine's bank verification service for routing and account number validation across dev, staging, and production; managed sprint work items, pull requests, and board activities via Azure DevOps TFS.
- Worked with Redis for cache management, IIS for application hosting within Citrix/VM environments, and Rancher for container orchestration across deployment pipelines.

EDUCATION

Bachelor of Technology (B.Tech) in Information Technology 2019 – 2023 | Asansol, India
Asansol Engineering College

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Computer Networks, Operating Systems.

CGPA: 9.3 / 10

CERTIFICATIONS & ACHIEVEMENTS

- Microsoft Azure Fundamentals (AZ-900) (Microsoft).
- Selected for the competitive Martian Internship Program at Persistent Systems.
- Awarded top project recognition at Code Carnival, a company-wide internal project showcase at Persistent Systems.
- Ranked in the top 0.5% globally (Rank #2364) out of hundreds of thousands of participants in TCS CodeVita Season 10.
